HIGH CONFIDENCE SOFTWARE REUSE IN LARGE SYSTEMS: 10TH INTERNATIONAL CONFERENCE ON SOFTWARE REUSE, ICSR 2008, BEJING, CHINA, MAY 25-29, 2008

Springer. Paperback. Book Condition: New. Paperback. 436 pages. Dimensions: 9.2in. x 6.1in. x 0.9in.Software reuse depicts a great vision for the software industry. It has been widely viewed as a promising way to improve both the productivity and quality of software development. However, despite of the successes we have achieved, there are still many issues that have limited the promotion of software reuse in the real world. Therefore, software reuse has remained an important hotspot of research. ICSR is the premier international conference in the field of software reuse. It has been an important venue for presenting advances and improvements within the software reuse domain, and a powerful driving force in promoting the interaction between researchers and practitioners. The theme of ICSR 10 was High Confidence Software Reuse in Large Systems. A high confidence system is one that behaves in a well-understood and predictable fashion. Todays trends towards widespread use of commercial off-the-shelf (COTS) technology, increased integration, continuous evolution, and larger scale are yielding more complex software systems. So, the problem of how to build high confidence complex systems and how to reuse software with a high level of confidence has become a new attractive topic for research. Furthermore, high-level software asset reuse has been a goal for the last 2030 years, and it can still be considered an unsolved question. Components-based development, MDA-MDE-MDD, extreme programming, and other techniques or methods are promising approaches to software reuse that still need more research. These proceedings report on the current state of the art in software reuse. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
