Excerpt from The Influence of Communication Technologies on Organizational Structure: A Conceptual Model for Future Research The objective of the article is to conceptually integrate communication related dimensions of knowledge-based tasks in a simplified model. The initial information of the model is a static interrelation of task dimensions, and organizational structural forms most effective for tasks described in terms of these dimensions. The dynamic version of the model consists of the hypothesized relation between organizational structure and communication related information technologies, such as sophisticated electronic mail, systems computer-conferencing, and document search and retrieval systems, in enhancing communication, and consequently, task performance. The metrics of the conceptual model's dimensions, and the model's applicability to future research of communication, and to managerial practice in the technological era are discussed.
