

Mortality Statistics Volume 11

By United States Bureau of the Census

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . year, so that for future comparisons the total of congenital debility and ill defined and unknown causes should be combined. The distribution, by days, weeks, and months, of deaths occurring before the completion of the first 2 years of life, as given in Table 10, may be continued in future bulletins for individual states and for the registration cities of 250,000 population and over. Such data would be more valuable if it were possible to reduce the figures to a comparative basis by showing the ratios of deaths to births in each area. This, however, is impossible at present because of the imperfect registration of births. TYPHOID FEVER. The total number of deaths from typhoid fever returned for the registration area for the year 1910 was 12,673, equivalent to a death rate of 23.5 per 100,000 estimated midyear population. This number represents an increase of...

Reviews

A top quality ebook and the typeface used was interesting to learn. This can be for all who state that there had not been a well worth reading through. I am just pleased to tell you that this is basically the very best ebook I actually have gone through in my individual life and can be the finest book for at any time.

-- **Mr. Carol Bergnaum IV**

This publication will not be straightforward to begin on studying but quite fun to see. It really is basic but shocks in the fifty percent of the ebook. I realized this ebook from my dad and I advised this pdf to learn.
